

How to build a Swiss Digital Nomads Village?

WWW.BERGSPITZMEDIA.CH

Our Statement **REMOTE FIRST!**

Remote Work has gone mainstream and with that location independence suddenly has become a possibility for millions and soon maybe billions for workers. Now imagine how many tourists will travel and stay for a couple of months once they're not tied to a place by their work anymore.

What you will **GET FROM US**

We inspire tourism office staff members for Coworking / Remote Work and build a strong understanding. We help you marketing your alpine destination to Remote Workers and Digital Nomads. And, if desired, we also take over the technical implementation of the booking portal.

Two-days **WORKSHOP**

We conduct a two-days workshop. On the first day we show you the potential of Remote Work for your destination, on the second day we work out a detailed implementation plan together.

Consulting for **TOURISM MANAGERS**

We carry out a multi-stage assessment on site and provide you with a detailed implementation plan for your Digital Nomads Village.

Target audience: Tourism managers, Municipalities & Hoteliers

Who we are? **REMOTE PIONEERS**

The two co-founders of the first Coliving Space in Switzerland, the president of the association Digital Nomads Switzerland, an intuitive life coach and a PR expert joined forces in spring 2020 to help the Swiss tourism industry build and operate successful Digital Nomads Ecosystems.
